

# What is an ERP ?

## List of ERP Software for Small Business

ERP SOFTWARE STANDS FOR ENTERPRISE RESOURCE PLANNING. IT IS A PROCESS BY WHICH A COMPANY INTEGRATES AND MANAGES THE ESSENTIAL PARTS OF ITS BUSINESS. ERP SYSTEMS PROVIDE ANALYTICS, VISIBILITY, AND EFFICIENCY ACROSS EVERY ASPECT OF A BUSINESS, OR WE CAN SAY THAT ERP SOFTWARE INTEGRATES THE VARIOUS FUNCTIONS INTO A COMPLETE SYSTEM TO STANDARDIZE PROCESSES AND INFORMATION ACROSS THE ORGANIZATION.

### WHAT DO SMALL BUSINESSES NEED TO UNDERSTAND?

- Within a small company or a startup, employees have to work in different departments handling multiple tasks, i.e., the employee's pitch in wherever and whenever the need arises.
- ERP systems that are geared towards small businesses can brew and automate vital business functions.
- While ERP software is integrated over all departments of an organization, Implementing an ERP system calls for careful planning to minimize the risk of failure and to assure goals are achieved.
- This requires an established ERP strategy before the selection and involvement of all business and its staff members in the process.
- Any company can get a good ROI from the use of an ERP system if the execution is done correctly.

### WHAT BENEFITS DO SMALL BUSINESSES GET FROM ERP SOFTWARE?

- **Transparency**
- **Improved Decision-making**
- **Increase in Productivity**
- **Cost-Efficient**
- **Higher flexibility**

### WHAT DO SMALL BUSINESSES NEED TO UNDERSTAND?

- Most businesses start with just the basics. This may include simple accounting software and document-based processes—i.e., spreadsheets and documents.
- As the company expands and transactions increases, it may become more time-consuming and difficult to process a larger volume of data. This is true if the information is stored in separate systems or databases.
- ERP can automate these manually done processes, helping an organization to allocate more time for sales and business development instead of administrative tasks. Moreover, ERP software allows proper workflow from inquiry to invoice and payment.

## Here's a list of Top ERP systems for small businesses
